

SONU

+91-9569695752 | vermasonu0625144@gmail.com | linkedin.com/in/sonu0625 | github.com/Sonuverma0625

Self-motivated Software Engineering student skilled in C, C++, Python, and JavaScript with hands-on experience in full-stack web development, embedded systems, and IoT applications. Strong grasp of data structures, version control, and collaborative practices. Experienced in autonomous robotics and real-time data pipelines, with a proven track record in competitive coding and hackathons. Committed to writing clean, efficient code and delivering high-quality, impactful solutions.

SKILLS

Languages: C, C++, Python, JavaScript

Web Technologies: HTML, CSS, Bootstrap, React, Node.js, Express.js, MongoDB, RESTful APIs

Tools & Platforms: Git, GitHub, Arduino, MATLAB, Figma

Core Competencies: Problem Solving, Data Structures & Algorithms, Debugging

EDUCATION

B.Tech - Electronics & Communication Engineering PSIT Kanpur	2023 - 2027
12th Intermediate (PCM) Score: 64.8% Saraswati Vidya Mandir Inter College	2022
10th High School Score: 75.5% Gola Public Inter College	2020

PROJECTS

E-Commerce Web Application / *React, Node.js, Express.js, MongoDB, Bootstrap*

- Developed a scalable RESTful API with Node.js/Express.js, integrated with MongoDB for dynamic product catalogs and order tracking.
- Implemented secure user authentication and authorization pipelines using JSON Web Tokens (JWT) and bcrypt hashing.

Travel & Booking Platform / *React, Node.js, Express.js, MongoDB, REST APIs*

- Architected a full-stack MERN platform featuring destination guides, interactive booking interfaces, and customer reviews.
- Integrated interactive map APIs and built backend routes to process dynamic server-side validation and booking updates.
- Designed clean MongoDB schemas to efficiently manage user records, travel packages, and community review submissions.

Dynamic Portfolio Dashboard / *React, Node.js, Express.js, MongoDB, CSS3*

- Crafted a sleek portfolio using React and modern CSS animations to ensure high-performance cross-browser and mobile responsiveness.
- Integrated a Node.js backend linked to a database to securely log and track real-time visitor engagement analytics.

Maze-Solving Robot Car / *Arduino, C++*

- Built an autonomous robot utilizing the Flood-Fill algorithm for optimal pathfinding and real-time navigation.
- Integrated IR and ultrasonic sensor arrays for precision obstacle detection and wall-following capabilities.

Smart GPS Tracker System / *Arduino, GSM, GPS*

- Designed a real-time location tracking system using GPS/GSM modules to stream live coordinates to a cloud database.
- Optimized device power consumption metrics and serial communication protocols to sustain reliable data transfers.

INTERNSHIP

AI/ML Intern | Edunet Foundation (AICTE) Dec 2025 - Jan 2026

- Engineered predictive machine learning models leveraging Python and Scikit-learn architectures.
- Conducted comprehensive data preprocessing, feature engineering, exploratory visualization, and metric evaluation.

CERTIFICATIONS & ACHIEVEMENTS

- Certifications:** AWS Cloud Practitioner Essentials | GenAI Powered Data Analytics (TATA) | Software Engineering simulations (JP Morgan, Accenture).
- LeetCode:** Solved 350+ coding questions with an active 365-Day Badge.
- HackerRank:** Badges in Problem Solving (5), C++ (4), alongside C and Python credentials.
- Competitive Coding:** Ranked 360th out of thousands in the Codequest #29 Challenge hosted by Naukri Campus (Mar 2026).
- Hackathons:** National-level participant in the EY Techathon 6 technology innovation competition by Ernst & Young.
